

Cystic Fibrosis

Harutai Kamalaporn, M.D.
Pediatric Pulmonology,
Ramathibodi Hospital

Cystic Fibrosis (CF)

- the most common autosomal recessive genetic disorder of Caucasians
- 1:3,600 livebirth
- Cystic Fibrosis Transmembrane conductance Regulator (*CFTR*) gene on chromosome 7
- *CFTR* was first identified in 1989 at SickKids, Toronto by Dr. Lap-Chee Tsui

CFTR mutations

- There are currently 1604 mutations
- $\Delta F508$ is the most common mutation, accounting for 70% of CF worldwide
- genetic variations influence severity of CF
